

# CAN MODERN DNA SCIENCE CRACK THIS CELEBRITY COLD CASE?

The 1978 murder of actor and American icon **Bob Crane** remains one of the most **high-profile unsolved celebrity murders** of all time. Thirty-eight years after his brutal murder in Scottsdale, Arizona, millions around the world still want answers. Was John Carpenter the killer? Or did police arrest an innocent man?

For nearly 40 years, police remain convinced of Carpenter's guilt. Early DNA testing, decades ago, was unable to positively link Carpenter to the crime. The two friends lived on the edge, sharing a **dark obsession**—videotaping women during their sexual encounters.

In an unprecedented investigation, reporter John Hook **retests the DNA and blood evidence** from the murder scene in this **haunting cold case**. Scientists believe this is the last attempt—the Final Close-Up—using **modern DNA science** to identify Crane's killer. And the **results are shocking!**

*Who Killed Bob Crane?* is Hook's first-hand account of a two-year investigation and **search for the truth**. It's seen through the eyes of the people who were there—witnesses, detectives, prosecutors, jurors, and family members. He takes readers on an **incredible reporter's journey** for an inside look at the sensational physical evidence in a final attempt to learn the truth in ***Who Killed Bob Crane?***
